Elevate. Innovate. Automate.

Summary

Security+ Certified Infrastructure Specialist and 2025 WayUp Top 100 Intern with a focus on high-security municipal and defense environments. Proven track record in full-lifecycle identity management, hardware modernization, and public safety technology support. Experienced in maintaining system reliability for 400–1,000+ users through proactive troubleshooting and infrastructure optimization.

Areas of Expertise

Cloud & Identity Management	Infrastructure & Virtualization	Networking & Security
○ Active Directory & Entra ID	○ VMware vSphere & vCenter	○ Fortinet (Gate, NAC, VPN)
○ Windows Server 2016-2025	○ Windows Server 2016-2025	○ IPsec & SSL VPN Config
○ Onboarding & Offboarding	○ Ubuntu Linux & Apache/Tomcat	○ UEFI/TPM Security Standards
○ Hardware MFA (YubiKey/Token2)	○ MDT & Law Enforcement Tech	○ DOD-Compliant Data Wipe

Professional Experience

Information Technology Intern **June 2025 – Present**

City of Oconomowoc

- Acted as a primary technical point of contact for the Police Department. Maintain mission-critical hardware including squad car MDTs, body-worn camera syncing stations, and taser firmware updates.
- Manage user account creation and deactivation workflows in Active Directory and Exchange; implemented Token2 NFC hardware MFA for municipal staff.
- Led the migration of 50+ municipal workstations to Windows 11, performed hardware lifecycle upgrades (SSD cloning and storage expansion) to meet security compliance.
- Deployed and configured Stirling PDF on an Ubuntu VM using Apache/Tomcat. Adjusted DNS records and configurations to provide a secure internal utility for city staff.
- Improved mobile access for field staff by resolving VPN connectivity barriers on Apple devices via IPsec protocol configuration on Fortinet firewalls.

Information Technology Intern **October 2025 – Present**

Sparton Corporation

- Execute the "Joiner/Mover/Leaver" process for a global defense workforce of 1,000+ users, including AD account provisioning and application-level terminations.
- Manage the assignment and recovery of YubiKey hardware tokens to ensure secure authentication across the global enterprise.
- Manage the full ticket lifecycle within the enterprise ITSM by categorizing, escalating, and resolving problem/issue tickets to maintain high service level agreements (SLAs).
- Leading a strategic overhaul of the IT Knowledge Base, auditing legacy documentation and assigning solution owners to reduce ticket escalation rates.
- Facilitate the secure disposal of legacy Cisco networking hardware, ensuring configuration backups are secured, and hardware is disposed of per defense security standards.

Other Experience

Server Assistant, World of Beer Franchising, Inc. **April 2024 – October 2025**

Floor Associate, Lorleberg's True Value Hardware & Rental **September 2019 – July 2025**

- Demonstrated strong customer service, inventory management, and cash handling ability in fast-paced retail and hospitality environments.

Education

Bachelor of Science, Information Technology **August 2022 – May 2026**

University of Central Florida

- UCF Men's Lacrosse (MCLA D1), Knight Hacks, Society of PC Building, GameDev Knights, IT Club

Projects

Home Lab

Hybrid-Cloud & Infrastructure Hardening

- Deployed a Proxmox Virtual Environment on a low-energy Intel NUC to host 10+ active VMs and containers (Ubuntu, Windows Server).
- Implemented Tailscale (WireGuard) as a Zero-Trust remote access solution, bypassing apartment-managed CGNAT to enable secure file access from anywhere.
- Set up Uptime-Kuma and AdGuard Home for network-wide DNS-level ad blocking and service health monitoring.
- Hosted a high-resource Modded Minecraft Server on Ubuntu Linux. Configured automated backups, Systemd service management, and firewall port-tunnels for external players.

Active Directory & Virtualization Setup

CNT 4603 Course Project

- Built a multi VM virtual network using Oracle VirtualBox with Windows Server 2022 and Windows 10 instances.
- Implemented Active Directory for Domain Services, Group Policy, and user administration.
- Wrote PowerShell scripts to automate system administration tasks.
- Designed and analyzed AD architectures and conducted virtualization feasibility assessments.

Stat Lab

Full-Stack Web Application

- Engineered a real time, multisport performance platform for individuals and friend groups.
- Designed a relational data model supporting player profiles, game logs, team rosters, and advanced metrics.
- Built social features including friend connections, shared updates, and competitive leaderboards.
- Created interactive dashboards for splits analysis, game history, and real time teammate tracking.

Certifications

CompTIA Security+ ce
Microsoft IT Support Specialist
Azure Administrator (Expected April 2026)
